

CRANIAL SWELLING

JULY 2018

CASE STUDIES - CRANIAL SWELLING

At Total Therapy Solutions NZ we treat a wide range of client, varying age groups with many different ailments. We use the following therapies - Manual Lymph Drainage (MLD), Combined Decongestive Therapy (CDT), h Myofascial Release (MFR) and Reflexology in combination with Mobiderm products we have had some amazing results.

GOALS

Decrease inflammation and reduce the size of any swelling due to fluid retention.

Also enable our clients to apply self-treatment at home with products that have been modelled to deal with their unique issue.

SPECIFICATIONS

We have utilized the Mobiderm pads and strips in two sizes, normally in compression therapy but we are developing a 'Cranial Cap' to help relieve the symptoms of excessive lymph fluid under the scalp.'

CLIENT OUTLOOK

Most of my clients have never had any choice but to put up with their conditions and had given up hope of finding a solution to ease the pain or swelling. It was a pleasure to be able to offer a range of therapies and products that can ease symptoms for them.

CRANIAL SWELLING

What causes cranial swelling?

CASE STUDIES - CRANIAL SWELLING

CLIENT: Chris R – Age 60

PRESENT

Male who has been a Paraplegic from waist down for over 35 years, he has been holding a lot of lymph in and around the head for many years. Which in turn results in multiple ear infections and muscular fatigue in the neck & shoulders.

TREATMENT

He has had regular treatments of MLD/CDT/REFLEXOLOGY. By using the Mobiderm during the combined decongestive treatment there is a noticeable difference around the neck and head.

TREATMENT PLAN

Create a cranial cap that uses Mobiderm to help regularly drain the skull and neck between treatments with us.

CASE STUDIES - CRANIAL SWELLING

CLIENT: Alexa K Age 19

PRESENT

Professional athlete - world champion trampoline. As a result of concussion, Regular headaches and pressure on the skull from a trampoline accident followed by a drunk driver crashing into her car some weeks later. Sometimes she would just have to sleep for hours to settle the feeling in her head. It also means she has regular infections in her ears and sinus areas.

TREATMENT

She has had regular treatments of LFR, CDT, REFLEXOLOGY.

TREATMENT PLAN

Create a cranial cap that uses Mobiderm to help regularly drain the skull and neck between treatments with us. Also, as she travels on a regular basis for competitions around the world, I wanted something she can wear after her long fights to keep help take away some the pressure she feels between her scalp & skull.
